

# AGENDA

## The Future of IT & Cybersecurity CIO & CISO Think Tank

### SPEAKERS

**Devin Rudnicki**  
CISO  
Fitch Ratings

**Abhay Shah**  
Head of Technology,  
Infosec Risk &  
Compliance  
DoorDash

**Katie Hanahan**  
Deputy CISO  
AMA

**Timothy Winders**  
AVP, Deputy CIO  
Purdue University

**Kevin McDermott**  
CTO Former  
Cook County

**Sid Chakravarty**  
VP Performance  
Insights (Analytics)  
Synchrony

**Ravi Vemuri**  
EVP Data & Analytics  
TriMark USA

**Vijay Jakka**  
Global Data  
Governance Leader  
MetLife

**Gokula Mishra**  
VP of Data Science  
Direct Supply

**Shirley Mui-Lyles**  
Former MD,  
Technology &  
Innovation  
CIBC

**Grant Ecker**  
VP Chief Enterprise  
Architecture  
Ecolab

**Rahul Trivedi**  
VP of Operations  
Executive Council for  
Leading Change  
(ECLC)

**Brent Deterding**  
CISO  
Afni, Inc.

**Sugato Bose**  
Chief Enterprise  
Architect  
Medline Industries

**Erik Hart**  
CISO  
Cushman &  
Wakefield

**Yael Gomez**  
Fractional CIO/CTO  
Former VP, Global IT  
Integration  
Walgreens

**John Kellerhals**  
President / CISO  
InfraGard Chicago

**Nitin Raina**  
CISO  
ThoughtWorks

**Imran Shaikh**  
CTO  
Shore Capital  
Partners

**Richard Rushing**  
CISO  
Motorola Mobility

**Girish Bhat**  
SVP  
Revefi

**Russ Felker**  
CTO  
Trinity Logistics

**Tim Morris**  
Chief Security  
Advisor - Americas  
Tanium

**Michael Wareman**  
CISO - Director IS &  
Infrastructure  
Marmon Holdings,  
Inc

**Dean Coclin**  
Sr. Director Trust  
Services Specialist  
DigiCert

**Ben Roohani**  
Former Director of  
Information &  
Simulation  
Technology  
City Colleges of  
Chicago

**Tina Lampe**  
Director IT Software  
Engineering  
DIRECTV

**Dina Kamal**  
Field CTO & Canada  
GM  
DataBahn

**Shashwat Sehgal**  
Co-founder and CEO  
Po Security

**George Wang**  
CMO  
Peterson Technology  
Partners

**Ciaran Flaherty**  
Partnerships Lead  
Luminance  
Technologies Ltd

**Brett Nakfoor**  
VP of Sales  
Red Access

# Beyond Compliance: Why Security Principles Lead the Way

Security focuses on actively protecting systems and adapting to new threats, while compliance is about following rules, which often only covers the basics. A company that only cares about compliance can still be at risk. Prioritizing security helps protect valuable data, build customer trust, and stay ahead of new dangers, offering better long-term protection than just meeting regulations.

10:00 AM-10:45 AM

### 2025 Executive Evolution: Mastering the Art of Business-Technology Harmony

Bridging the gap between business and technology is not easy and requires discipline and balance between technology, people, and business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models.

For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs and CISOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

### Secure Web Browsing, It May Not be What you Think

Secure Web Browsing can mean different things to different people. Come to this short presentation and find out why current solutions in the market do not protect your browsers or the browsers of third parties trying to access your information. Find out why there are different approaches to solving for this and that the most secure approach might be something you didn't know existed.

## PANELISTS

**Brett Nakfoor**  
VP of Sales  
Red Access

## Coffee Break

## FIRESIDE CHAT

11:30 AM-12:05 PM

### Unleashing Cryptoagility: A Blueprint for Modernizing PKI Solutions

In the ever-evolving landscape of digital transformation, organizations are facing unprecedented challenges in securing and scaling their cryptographic infrastructure. Yet the need for crypto agility has never been more critical as companies grapple with risks posed by advanced technologies such as AI, emerging threats like Post Quantum Cryptography (PQC), and the complex web of compliance mandates, management hurdles, and technology transformations.

Join a lively roundtable discussion with a panel of your peers to gain actionable strategies as we explore:

Reducing IT resource burdens and costs through centralized certificate management

Preventing costly business outages and addressing potential security vulnerabilities

Building private and public trust while eliminating human error

Don't miss this opportunity to learn best practices and elevate your organization's cryptographic resilience. Be part of the conversation that prepares for a quantum-safe future and shapes the future of secure digital landscapes

## FIRESIDE CHAT

12:10 PM-12:45 PM

### Next-Level Innovations: Unveiling Gen AI - The Hype, The Reality, and The Future

We will explore the evolution of Gen AI, from its inception to its transformative impact across various industries. Experts will discuss the disparity between the media-driven hype and the technology's real-world capabilities, sharing case studies and addressing current challenges. The conversation will also cover the economic and ethical implications of Gen AI, providing insights into its future advancements and regulatory landscape. Attendees will gain a nuanced understanding of Gen AI's potential and the strategic considerations necessary for its successful integration into diverse sectors.

## The Future of Identity and Access Management in Modern Enterprises

1:35 PM-1:50 PM

As enterprises migrate to the cloud, the complexity of managing identity has grown exponentially, and identity has emerged as the single largest threat vector. There has been an explosion in the number of identities - both human and machine, as well as the number of ways these identities can access sensitive cloud resources. The traditional perimeter-based security model is no longer sufficient to protect against identity-based threats. This session will explore the future of governing access in modern enterprises. We will focus on how enterprises in different cloud maturity levels—whether migrating workloads or operating cloud-native—can evaluate their identity posture, and drive towards best practices such as JIT access, least-privilege, and automated secrets rotation. Attendees will gain insights into how to reduce the attack surface, and strategies to ensure security without compromising agility and productivity.

## Embracing Innovation: Best-of-Breed Emerging Technologies from Silicon Valley ... and Beyond!

1:55 PM-2:40 PM

This panel discussion will take you on a journey through the forefront of technological innovation, featuring three visionary solutions poised to revolutionize the digital landscape. These pioneering solutions address pressing challenges faced by organizations worldwide, ranging from permissions management to troubleshooting live applications and system observability.

In today's dynamic digital landscape, managing permissions effectively poses a significant challenge for organizations. However, a pioneering solution emerges to address these pressing concerns by automating permissions management based on risk and usage patterns, ensuring alignment with business needs while minimizing security risks. Moreover, a revolutionary toolset empowers developers and SREs to troubleshoot live applications swiftly and efficiently, slashing mean time to resolution and delivering substantial cost savings. Dive deeper into how these groundbreaking approaches drive productivity gains and cost efficiencies for organizations worldwide.

# Cybersecurity Leadership in the Era of AI and ML: Navigating Innovation and Responsibility

In the dynamic realm of artificial intelligence (AI) and machine learning (ML), CISOs play a pivotal role in leveraging these advancements for enhanced cybersecurity. Strategic integration of AI and ML is essential for bolstering security measures, optimizing decision-making, and driving innovation. CISOs must adopt a comprehensive approach, considering the entire lifecycle of these technologies to ensure both efficiency and ethical use. Establishing robust governance frameworks becomes paramount, addressing biases, ensuring transparency, and minimizing unintended consequences.

Looking ahead, as AI and ML continue to advance, CISOs face evolving challenges and regulatory considerations. Proactive engagement involves staying informed about changing regulations, particularly in areas such as data privacy and ethical AI practices. CISOs should strive for a tech-enabled understanding of AI and ML systems, encompassing deployment, impact, and security measures. This approach positions organizations to navigate the regulatory landscape effectively, ensuring responsible and competitive integration of AI and ML into cybersecurity strategies.

# 8 Stages of the AI "Emotional Rollercoaster"

In "8 Stages of the AI Emotional Rollercoaster," we explore how AI is revolutionizing IT operations and cybersecurity, transforming our approaches to data analysis, threat detection, and endpoint management. We'll delve into the emotional rollercoaster of technology adoption, address the new risks posed by Gen AI, and discuss how to balance the need for speed and real-time data with security imperatives.

This talk will equip you with a deeper understanding of the current landscape and future trajectory of AI in our industry. We will examine the emotional stages of AI adoption, from initial excitement and hype to doubt and eventual acceptance, and how these emotions influence corporate technology strategies. Additionally, we will discuss practical guidance on safeguarding against potential threats in this rapidly evolving landscape, providing a balanced view of innovation, speed, security, and shadow AI risks.

Come discover how to harness AI's potential while navigating its challenges and gain valuable insights into the transformative role of AI in cybersecurity and IT management.

### Unlocking the Power of Diversity in Technology: Driving Innovation

In today's rapidly evolving technology landscape, diversity is not just a buzzword – it's a strategic imperative. This panel will explore the critical role that diversity plays in enhancing cybersecurity efforts, from bolstering defenses against sophisticated attacks to fostering innovation and resilience within organizations. Our esteemed panelists will share insights, experiences, and best practices for cultivating diverse teams, leveraging varied perspectives, and building inclusive cultures that empower technology professionals of all backgrounds to thrive. Join us as we delve into the transformative potential of diversity in shaping the future of technology.
