

# AGENDA

## The Future of Cybersecurity & IT CIO & CISO Think Tank

### SPEAKERS

**Barbara Kissner**  
CIO  
Segal

**Brook Dutcher**  
VP, Cyber Strategic  
Initiatives  
Allied World  
Assurance Company  
Inc.

**Stacey Romanello**  
SVP, Chief Risk  
Officer  
Banc of California

**Amit Basu**  
VP, CIO & CISO  
International  
Seaways

**Harry Halikias**  
Sr. Director, Global  
Information Security  
Sony Music  
Publishing

**Tom Yang**  
Director, Engineering  
NBCUniversal

**Muthukumar  
Devadoss**  
Director, Information  
Security  
TradeWeb Markets

**Ryan Coelho**  
Director, Net  
Revenue  
Zoetis

**Girish Kolar**  
Director, IT & Cyber  
Security  
International  
Seaways

**Ilya Alper**  
VP Enterprise  
Architect  
Barclays

**Shariff Mohammed**  
Director of Cloud  
Transformation  
Capital One

**Kiran Bhujle**  
MD, Global Head of  
Cyber  
SVAM International

**Steve Craig**  
Sr Technical Services  
Architect/Director IT  
New York  
Presbyterian  
Hospital

**Katie Kirts**  
Global Director of  
Technology  
New York Life  
Investments

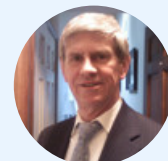

**Monserate  
Fernandez**  
CIO  
IBO

**Ash Dhupar**  
CDAO  
Analog Devices

**Bijit Ghosh**  
CTO, Head of  
Engineering  
Wells Fargo

**Ivan Durbak**  
CIO  
BronxCare Health  
System

**Amir Sternhell**  
Chief Strategy Officer  
Sertainty

**Timothy Swope**  
CISO  
Lighthouse Cyber  
Risk Management

**Fernando Pinguelo**  
Chief Counsel, Cyber  
Security  
WTW

### The Future of Generative AI: Transforming Business and Technology

Explore the transformative potential of Generative AI in this forward-looking session, where we will delve into how this cutting-edge technology is set to revolutionize business and technology landscapes. We will discuss emerging trends, anticipated advancements in the next 12-24 months, and their impact on various industries. Learn about practical applications of Generative AI, from enhancing customer experiences to driving innovation and operational efficiency. Our experts will also address the ethical considerations, regulatory challenges, and best practices for successful AI integration. Join us to gain insights into how Generative AI can unlock new opportunities and shape the future of your organization.

## Data Revolution Leadership: CIOs at the Helm of Modernization for Strategic Value

This session explores the pivotal role of CIOs in modernizing data to unlock its full value. In the contemporary digital landscape, data stands as a strategic asset, and CIOs are at the forefront of harnessing its potential. The abstract emphasizes the CIO's responsibility in implementing cutting-edge technologies and data management strategies that go beyond mere storage, enabling organizations to derive actionable insights. By adopting innovative approaches, such as advanced analytics, artificial intelligence, and cloud solutions, CIOs can transform data into a valuable resource, driving efficiency, innovation, and informed decision-making across the enterprise. The discussion delves into the evolving responsibilities of CIOs in leading the charge towards data modernization, ensuring organizations remain competitive and agile in an increasingly data-centric world.

## Rearchitecting the Enterprise for Agentic AI: Control, Collaboration, and the Next Frontier of Automation

Agentic AI, autonomous systems that perceive, reason, and act with minimal human intervention is poised to redefine how work gets done. As these intelligent agents move beyond experimentation into enterprise-scale deployments, organizations must prepare to fundamentally rearchitect their digital environments.

This panel will explore how leaders can operationalize agentic AI to drive efficiency, creativity, and strategic advantage while preserving oversight, governance, and trust. Discussion topics will include designing workflows around autonomous decision-making, managing human-agent collaboration, and navigating emerging risks such as bias, security, and operational drift. Join us as we unpack what it truly means to lead in an era of intelligent, action-oriented AI and how to ensure these agents serve both your innovation goals and core business values.

## FIRESIDE CHAT

11:15 AM-11:50 AM

# Bridging Strategy and Systems: Aligning Business Goals with IT Innovation

In a world of rapid digital disruption, the most successful organizations are those where business strategy and IT execution move in lockstep. This panel brings together business and IT leaders to explore how to align long-term growth objectives with the right mix of emerging technologies—from AI and cloud platforms to data-driven decision-making and modern application architectures. Panelists will discuss how to break down silos between departments, drive innovation through collaborative planning, and build agile digital infrastructures that scale with evolving business needs. Expect insights on joint KPIs, governance frameworks, and the cultural shifts required to turn IT from a support function into a strategic growth enabler.

# The Future of Cyber Resilience: Winning in a World of Constant Threats

In an era of escalating cyber threats, evolving attack surfaces, and accelerated digital transformation, traditional security models are no longer enough. This keynote will explore what it means to build cyber resilience in today's complex environment—where speed, adaptability, and business alignment are paramount. From securing hybrid and multi-cloud environments to integrating AI-driven threat intelligence, we'll examine how leaders can future-proof their security strategies while enabling innovation. Learn how to shift from reactive defense to proactive resilience, ensuring your organization can not only withstand but thrive amid disruption.

## PANEL

1:30 PM-2:15 PM

# Securing the Rise of Agentic AI: Trust, Control, and Resilience in Autonomous Systems

As agentic AI systems evolve from experimental tools to enterprise-grade digital workers—capable of making decisions, taking actions, and adapting in real time—they introduce a new paradigm of both possibility and risk. Unlike traditional automation, agentic AI operates with greater autonomy, raising urgent questions for security leaders: How do we ensure control? How do we manage risk when systems learn, act, and adapt independently?

This panel will explore the security implications of deploying agentic AI across business operations—from data privacy and decision integrity to real-time threat mitigation and adversarial AI risks. We'll dive into the intersection of governance, identity management, and AI observability, and how CISOs can build frameworks that safeguard both the systems and the outcomes.

2:35 PM-2:50 PM

# What's AI Doing for You?

The terms "Artificial Intelligence" and "Advanced Machine Learning" are often thought of interchangeably. While there is a relationship between AI and AML, to say they are the same thing is an oversimplification and misclassification. Rather, one begets the other with AI being the basic principle upon which AML is developed. As AI begins to mature and migrate away from purely advanced mathematical operations into decision making paradigms, AML steps forward as the predictive ability of machines to process vast quantities of data. As data and analytics becomes foundational to the way every business operates, AI and AML will become foundational capabilities.

## FIRESIDE CHAT

2:55 PM-3:30 PM

# Cybersecurity Leadership in the Era of AI and ML: Navigating Innovation and Responsibility

In the dynamic realm of artificial intelligence (AI) and machine learning (ML), CISOs play a pivotal role in leveraging these advancements for enhanced cybersecurity. Strategic integration of AI and ML is essential for bolstering security measures, optimizing decision-making, and driving innovation. CISOs must adopt a comprehensive approach, considering the entire lifecycle of these technologies to ensure both efficiency and ethical use. Establishing robust governance frameworks becomes paramount, addressing biases, ensuring transparency, and minimizing unintended consequences.

Looking ahead, as AI and ML continue to advance, CISOs face evolving challenges and regulatory considerations. Proactive engagement involves staying informed about changing regulations, particularly in areas such as data privacy and ethical AI practices. CISOs should strive for a tech-enabled understanding of AI and ML systems, encompassing deployment, impact, and security measures. This approach positions organizations to navigate the regulatory landscape effectively, ensuring responsible and competitive integration of AI and ML into cybersecurity strategies.

## The Human Side of Tech: Why Soft Skills Are the Real Superpower

In a world obsessed with digital transformation, AI, and automation, it's easy to forget the power of human connection. But the truth is—technology doesn't lead, people do. As roles evolve and teams become more cross-functional, the ability to listen, influence, adapt, and collaborate has become just as critical as technical expertise.

Today's CIOs, CISOs, and tech leaders are expected not only to drive innovation, but to communicate across departments, manage diverse teams, and navigate uncertainty with empathy and clarity. Emotional intelligence, storytelling, active listening, and resilience are no longer “nice to have”—they're essential for anyone leading in a fast-moving, high-stakes environment.

Nowhere is this leadership shift more relevant than in the US particularly in NYC, a city built on creativity, reinvention, and cultural diversity. Here, the ability to connect across perspectives isn't just a professional skill—it's a way of life. As tech and business worlds converge, NYC's unique blend of innovation and human-centered thinking offers the perfect backdrop to explore how soft skills are reshaping the future of leadership.

This session dives into why the most successful executives are blending EQ with IQ to inspire trust, build alignment, and drive lasting impact.
