

The Java platform for the modern cloud enterprise.

Azul powers the world's most mission-critical and demanding Java applications.

Azul, provider of the Java platform for the modern cloud enterprise, is the only company 100% focused on Java. Millions of Java developers, hundreds of millions of devices, and the world's most highly regarded businesses trust Azul to power their applications with exceptional capabilities, performance, security, value, and success.

100% of the world's Top 10 Trading Companies
50% of Forbes Top 10 World's Most Valuable Brands
36% of the Fortune 100 Companies

Azul Platform Core

Open JDK for Enterprises

Low Cost, Secure

- TCK-tested and certified builds of OpenJDK
- Stabilized builds for immediate deployment
- Supports more versions of Java, including 6, 7, 8, 11, 17, 21
- Millions of deployments
- Curated to be production-ready
- Support for Azul Zulu Builds of OpenJDK and Eclipse Temurin

24x7x365 Support

Azul Platform Prime

High Performance JVM

Start Fast, Run Faster, Stay Fast

- Optimized OpenJDK build with higher throughput and carrying capacity
- Eliminates pauses, faster startup and efficient compilation
- Save infrastructure costs, in cloud or on-prem
- Improve responsiveness of Java-based technologies, e.g., Kafka, Cassandra, Spark, Solr, Hadoop
- Low latency Java (in trading systems)

24x7x365 Support

Azul Intelligence Cloud

Actionable Intelligence from Runtime Data

Boost DevOps Productivity

- Continuous detection of known vulnerabilities for all Java apps, frameworks, and infrastructure
- Eliminates false positives to focus scarce human remediation effort
- Runs in production with no performance penalty
- Provides code use analysis and visibility of unused code, lowering maintenance burden
- Retains detection history for historical traceability and focused forensics

World Class Customers Who Have Switched to Azul.

The Java platform for the modern cloud enterprise.

Join thousands of customers that trust Azul to deliver.

"We chose to work with Azul to de-risk the technology build and allow our team to focus on developing business logic. We got our Java signed, sealed, and delivered from the Java experts, and could keep our singular focus on creating the best exchange."

Dominick Paniscotti
Chief Technology Officer, MEMX

"With Azul Platform Prime, we were able to reduce our front-end server footprint by 30%, which is hundreds of servers, and our database server footprint by 50%. This translates into millions of dollars in savings, both hardware we freed up and hosting costs avoided."

Ariel Pizetsky
VP of IT, Taboola

Azul provides the same open source Java
LOWER COST. BEST-IN-CLASS SUPPORT.

Customers can reduce their Java TCO by 70%+
SECURE. STABLE. AFFORDABLE.

Azul Platform Prime achieves 224% ROI
TOTAL BENEFITS OF \$2.2M OVER 3 YEARS.

"Because Azul Platform Prime powers our Java-based platform, we don't have to worry about application speed or infrastructure costs. We can focus on our members' experience and rest assured that Azul Platform Prime will handle thousands of moves a second with the best performance possible on the world's best chess website."

Erik Allebest
Chief Executive Officer, Chess.com

"We are very satisfied with Azul support reaction times and professional services. Azul Platform Core was a drop-in replacement and migration has taken less than three months. Had we known how seamlessly and smooth the process would be, we would have switched from Oracle Java to Azul Platform Core much earlier on."

Michael Thalhammer
Head of Software Development,
Commend International GmbH

Azul is the largest company 100% focused on Java and the JVM

Azul has supported Java deployments for over 22 years

The Java platform for the modern cloud enterprise.

Leaders with a passion for Java.

Scott Sellers
President, CEO &
Co-Founder

Gil Tene
CTO & Co-Founder

The Java Champion Program was founded in 2005 to recognize outstanding achievements and service of community members.

The Champions are at the forefront of Java development and help drive vision behind Java technology.

"We have the people who carry the maintenance and development work, and employ over 100 full time engineers that work solely on JVMs and JDKs. We lead OpenJDK maintenance projects, and employ a multitude of active maintenance leads, reviewers, and contributors. We've been successful in supporting product Java deployments for well over a decade, and have the critical mass of capabilities, experience, expertise and resources."

Gil Tene, CTO & Co-Founder, Azul
