

The Leading Cyber Range-as-a-Service

PROACTIVE CYBER DEFENSE
REAL-WORLD RESULTS

ENSURE YOUR CYBERSECURITY TEAM IS BATTLE-READY

For your security team to achieve world-class caliber, they need to know exactly **what** to do, **when** to do it, and **how** to do it effectively.

It's critical to practice cyber defense and incident response safely, methodically, and proactively – with real attacks in a real-life environment. Cloud Range's cyber range program ensures you have the right cadence and the right continuous threat exposure management model to continue to improve and harden your environment.

- Customizable live-fire cyber ranges
- Fully integrated toolsets
- 1000's of scenarios
- Red team/blue team trainings
- IT • OT • IoT • Cloud • AI
- MITRE ATT&CK Aligned

Have confidence your team is ready to defend

95% of Cloud Range customers report that Cloud Range's real-world, hands-on simulation exercises help them and their team be more prepared for future events.

Prove readiness with actionable metrics & results

Cloud Range tracks individual and team performance, response times, technical proficiencies, and soft skills. Customers have seen up to 56% improvement in less than 6 months!

Identify and bridge any gaps or vulnerabilities

Cloud Range's scenarios are mapped to industry-standard frameworks, including NIST/NICE and MITRE ATT&CK, so you can see what skills, techniques, tactics, and procedures to focus on.

Accelerate onboarding and time to value

Immersing new hires in live-fire simulation training makes them more productive faster. They get real-world experience in their role and full team interaction. Generate customized training plans in Cloud Range's Performance Portal™ based on experience, assessments, certifications, and objectives.

Improve your organization's security posture

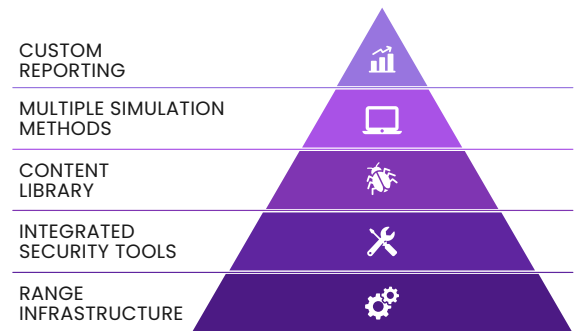

Cloud Range improves overall capabilities, procedures, and systems with the ability to use real security tools, test and validate playbooks, and gain real experience in live incident response and cyber defense. The result is more effective communication and reduced exposure to cyber risks for your whole organization.

BE READY FOR TOMORROW'S THREATS AND MEASURABLY REDUCE CYBER EXPOSURE

Just as a pilot must train in a flight simulator, so cybersecurity teams need to train in a simulated environment with real-life attack scenarios. Cloud Range's realistic, live-fire cyber defense simulation platform ensures your SOC and IR teams gain the necessary training and real-world experience to detect and mitigate any type of cyber attack, reducing the chances of a costly breach.

The immersive cyber range training program helps your team members develop essential abilities to identify and mitigate security threats – and the soft skills required to communicate and work effectively with others. Cloud Range enables teams to improve their ability to respond to cyber attacks, implement effective security protocols, and stay up-to-date with emerging threats and trends.

CLOUD RANGE SOLUTIONS

Team Simulation Programs for SOC and IR

- FlexRange™ – Annual subscription with Attackmaster-led missions
- Library of IT and OT cyber attack scenarios
- Blue/Red/Purple Team Exercises
- Capture the Flag Exercises

FlexLabs™

- 1,500+ cyber skills training and development modules

Range365™ Custom, Hosted Cyber Range Platform

Scenario Design and Development

Tabletop 2.0™ Next-Gen Tabletop Exercises

Hiring Assessments

- RightTrak™ Cyber Aptitude Assessments
- FastTrak™ Candidate Assessments

Exercise Design and Facilitation

Performance Management Portal (LMS)

Only Cloud Range provides a holistic suite of customizable services to ensure security teams have the critical skills and experience to take on today's complex threat landscape – which mitigates risk.
