DATASHEET

Arctic Wolf® Aurora™ Managed Endpoint Defense

OUTCOME-DRIVEN ENDPOINT SECURITY

AI-Powered Protection, Expert-Driven Response

In today's rapidly evolving threat landscape, organizations face relentless cyber attacks, AI-powered adversaries, and a shortage of skilled security professionals. As organizations expand their digital footprint, the security challenge only increases.

To keep pace, organizations need more than just tools — they need 24x7 monitoring, proven security expertise, and AI-powered solutions that can help stop today's threats. Yet many endpoint security solutions are overly complex, difficult to manage, and expensive to operate, placing additional strain on already overburdened teams.

Aurora Managed Endpoint Defense delivers 24x7 AI-powered detection and response, backed by world-class security experts. With continuous monitoring, threat hunting, and rapid containment, it reduces alert fatigue and accelerates investigations. Built on the Aurora Platform, it combines threat intelligence and automation to help organizations get one step closer to ending cyber risk.

Continuous Threat Monitoring

- 24x7 monitoring reduces your SecOps burden and ensures real-time threat detection
- Only high-confidence alerts are delivered after data is enriched with broad threat intelligence

Proven Security Expertise

- Our SOC analysts have an average 10 years of experience across diverse incident types
- Expert teams regularly assess your posture and partner with you to mitigate configuration drift

AI-Powered Prevention and Investigation

- The industry's longest-running, continuously trained algorithms help block zero-days
- Built-in AI assistant accelerates investigations and supports faster analyst decisions

The Cybersecurity Effectiveness Gap

While security spend has been increasing globally, cyber risks continue to accelerate:

$183B **Global cybersecurity spend in 2024**

▲ 13% Year-over-year increase in security investment

$16.6B **Reported cybercrime losses in 2024**

▲ 33% Increase in losses from 2023 to 2024

Tolly Certified

"Aurora Endpoint Security has Higher Efficacy with Lower Resource Utilization than Alternative Industry Solutions."

— Tolly Test Report

Comprehensive Managed Detection and Response

Aurora Managed Endpoint Defense delivers a comprehensive suite of security services, including expert-led threat hunting with automated, guided, and active response, and deep threat intelligence from Arctic Wolf Labs. With personalized onboarding and continuous posture assessments, your defenses evolve with your business needs and the threat landscape.

Streamlined onboarding and configuration

Our security experts deliver white-glove onboarding, customizing the platform to fit your unique environment and business needs

Proactive threat detection and hunting

Continuous, AI-driven detection with behavioral analysis is paired with automated and human-led threat hunting to uncover and stay ahead of emerging threats

Threat intelligence-driven capabilities

Expert insights into evolving threats power platform-level analysis and guide human-led investigations

Efficient incident management

AI-powered tools help to filter out noise, automate investigations, and prioritize critical threats for human analysis and response

Rapid and flexible response

We act fast through a structured escalation process, offering automated and active response options and guided remediation

Continuous tuning and reporting

Security configurations are continuously refined based on evolving threats and your environment, with regular reporting to keep you informed

Security You Can Count On

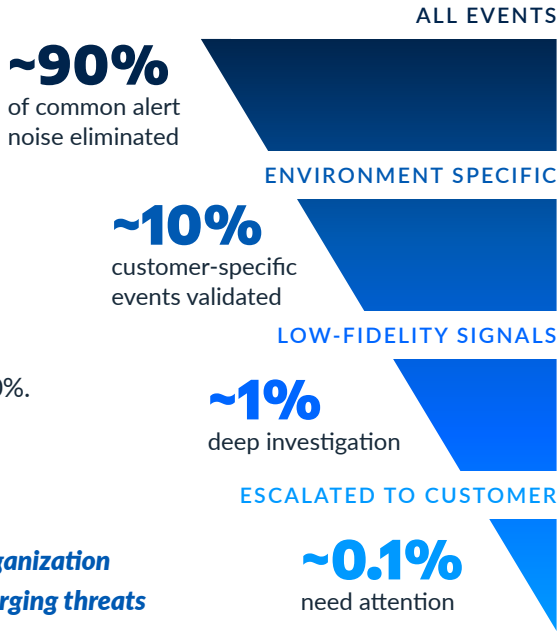
Filtering Out the Noise To Deliver High-Confidence Alerts

Our 24x7 monitoring and analysis across file, process, network, and identity activity eliminates false positives and low-fidelity signals. By enriching events with proprietary threat intelligence from internal research and crowdsourced telemetry, we identify high-confidence alerts and investigate them on your behalf. You're only notified when critical action is needed — reducing alert volume by over 99.7% and cutting internal workload fatigue by 90%.



Reduce alert and management fatigue

Close critical skills gaps

Keep your organization ahead of emerging threats

EXPLORE AURORA ENDPOINT SECURITY

About Arctic Wolf

Arctic Wolf® is a global leader in security operations, delivering the first cloud-native security operations platform to end cyber risk. Built on open XDR architecture, the Arctic Wolf Aurora™ Platform operates at a massive scale and combines the power of artificial intelligence with world-class security experts to provide 24x7 monitoring, detection, response, and risk management. We make security work.
